Planair Wall

Thalia is the perfect combination of design and functionality. It operates both indoors and outdoors and it is available in a wide range of configurations: from the 22" version - for complex one-to-one services - to the digital signage version, with an up to 80" multi-touch display for e-commerce services. The utmost attention was paid to its design: light, iconic, enhanced by thin coloured LED stripes on the sides.

Optional

Thermal printer

Thermal printer A4

Barcode Scanner

RFID reader

Webcam

Audio/Video Kit Voip

POS Electronic payments kit

Miriell is the concept that best represents the evolution of Digital Signage design. Its shape avoids conventional tropes and re-designs itself with great finesse.

The aluminum profile is lightened with lateral grooves and guides the eye along the totem's section: structured on three levels, until the glass panel separates from the chassis.

Miriell boasts a functional revolution also: it is possible to equip the totem with a webcam, thermal printer, card reader or POS payment systems. The powerful 43"-55" multitouch display ensures an exciting interactive experience

Miriell Indoor

Metal sheet and aluminum profiles chassis with vandal-proof graphic frontal glass

Rear maintenance door
