Outdoor 2021

SmartKiosk ITALY

Thalia outdoor

Thalia is the perfect combination between design and functionality. It operates both indoors and outdoors and it is available in a wide range of configurations: from the 22″ version - for complex one-to-one services - to the digital signage version, with an up to 80″ multi-touch display for e-commerce services. The utmost attention was paid to its design: light, iconic, enhanced by thin coloured LED stripes on the sides.

SmartKiosk ITALY

This innovative and user-friendly line stands out for its originality and ergonomics. Its characteristic outline makes it particularly accessible to the disabled user, in compliance with the ADA legislation. The horizontal display allows a wide consultation, and the display linear positioning at less than 150 cm makes the use of the 21.5"and 32" touch screens easier. Quasar has been designed both for indoor and outdoor use, with an inox steel Chassis, security lock, HB display and internal cooling system.

SmartKiosk
ITALY

A visual information tool based on augmented reality. Skyline offers tourists a real-time overview of the surrounding territory with intuitive tools to fathom its details and discover its secrets: the outdoor augmented reality technology finds in Skyline an elegant and versatile interpreter.

Thanks to its tailor made software app, it can detect turist, historical and cultural attractions from a wide area and link them to any kind of multimedia content, in order to give citizens and tourists an evolved and detailed vision of the region's landmarks. Skyline is aimed at tourism authorities looking for a way to revamp their image thanks to an innovative and effective tool, to promote history and culture of their region. With the "operational leasing" commercial solution, one can stretch the investment over a 3-year (or more) period and have setup, configuration and technical assistance guaranteed for the entire leasing time.
